

Please Join us for a Wonderful Service Opportunity

At the Pediatric Specialty Care Facilities (formerly known as Point Pleasant Pediatric Care) located in Doylestown, PA and Point Pleasant PA.

Quick Facts:

- PPPSC is a long term care facility with residents ranging from infants to 21 years of age.
- The medical needs of the patients vary. Some can converse, others cannot.
- Some of the patients have family visit them and some will eventually be well enough to go home.
- Unfortunately, approx. 75% of the patients have no family support at all (This means no visitors).

Teens, how can you help?

- Set aside 30 minutes or more of your time to show some friendship to one or more of the patients at the facility. Visit as often as your schedule allows. Bring a friend!
- Call ahead to let them know you are coming

Parents, how can you help?

- Talk this up with your kids; it is a wonderful opportunity for them to touch the heart of others suffering from physical impairments as well as loneliness.
- Background clearance (child abuse clearance and PA criminal check) is mandatory should you choose to visit with your children (or on your own). Please stop into the parish office to get this done if you don't already have it and are interested in helping out.
- No clearance is needed for youth under the age of 18.
